

# How to

# DOWNLOAD EBOOKS!

Downloadable eBooks come in three formats: Kindle, EPUB, and PDF. Kindle eBooks do not require any additional software besides a web browser and your Kindle device. However, before you download EPUB or PDF eBooks to your computer and transfer them to an eReader device, you must first install and activate **Adobe® Digital Editions**. Before you download EPUB eBooks to your mobile device, you must first install the **OverDrive® Media Console™** mobile app. Both are available for free from the Digital Media Collection website. Also see the website for a current list of compatible eReaders and mobile devices.

1

Start your web browser and visit: **Seft-municipal.lib.overdrive.com** Search for titles using the Quick Search form, or use the link to the Advanced Search. You can also use the different category links on the left side of the web page, or select titles displayed in the center of the page.

2

When you find titles that match your interests, make sure that they are available in the media format you need. The digital media collection contains eBooks in EPUB, PDF, and Kindle formats, as well as audiobooks in MP3 and WMA formats. Some titles are available in multiple formats, so be careful that you are selecting eBooks in the appropriate format.

# How to DOWLOAD EBOOKS!

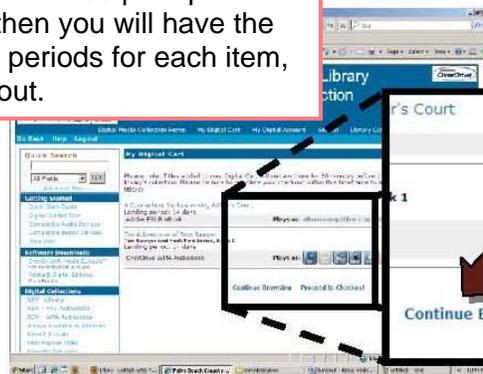

3

Each title will have links associated with it for each format that say 'add to Digital Cart,' or if all copies are checked out the links will say 'place a Digital Hold.' If you place a hold you will receive an email when a copy is available. If you wish to check out an available title, click the 'add to Digital Cart' link.

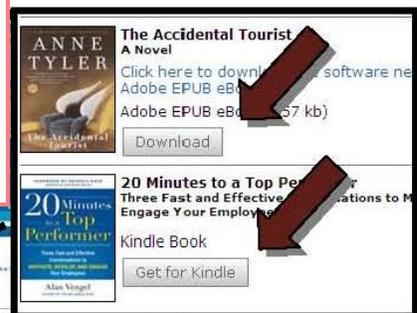

4

After adding an item to your cart, you will have the option to 'Continue Browsing' or to 'Proceed to Checkout.' When you choose to check out you will be prompted to enter your Library Card number, then you will have the option to choose different lending periods for each item, and finally to confirm your check-out.

5

Kindle titles will display a 'Get for Kindle' button which will connect you to your Amazon account, where you can send the title to your Kindle device. EPUB or PDF titles will display a 'Download' button which will launch **Adobe Digital Editions** (on a computer, for EPUB or PDF titles) or the **OverDrive Media Console** app (on a mobile device, for EPUB titles only) and begin your download.

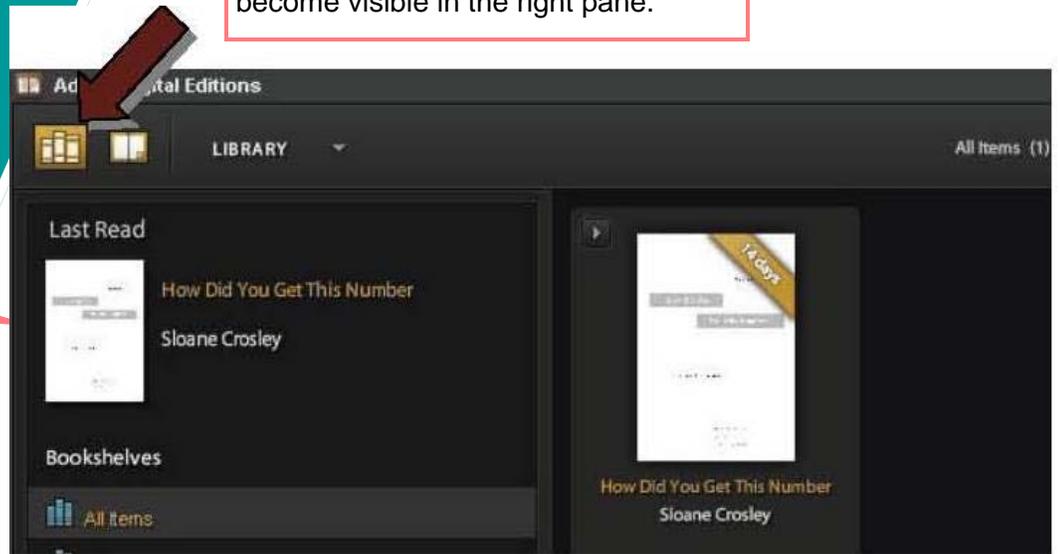

# Transferring eBooks... TO AN EREADER!

4

If necessary, click on the library view icon in the upper left corner of the Adobe Digital Editions window. Any books you've downloaded should become visible in the right pane.

5

To transfer a book to your device, simply drag the book cover image from the right pane over to the device icon on the left. The transfer will only take a few seconds. Once it is complete you may disconnect your eReader from your computer.
